

Are your drivers FOCUSED ON THE ROAD AND DRIVING SAFELY?

Are they texting? Surfing the internet? Checking emails?
Checking the weather, Facebook, and so on? Are they
receiving notifications?

Are they talking on the phone while driving?

With the help of the **ProtexMe** smart solution, you'll be able to:

Receive notifications in real-time when a driver is illegally using the phone while driving, speeding, leaving his assigned area, etc.

Minimize smartphone use while driving, thereby minimizing accidents and losses

Significantly reduces distractions when driving, thereby saving fuel

Issue detailed reports and compensate undistracted drivers

Monitor the number of driving hours of each driver and obtain notifications accordingly

See your drivers on the map in real-time, and view their routes

Tested and found:

Cell phone distractions cause drivers to lose their concentration and hit the gas pedal and brakes irregularly, greatly increasing fuel consumption

Obtain the test version for free and no commitment!

What is ProtexMe ?

A proven solution for the problem of driver distraction; the only one with command, control and management

Rich management interface for the manager

A control panel in the cloud, which receives complete data about the driver while driving: the number of messages sent and received, how fast he writes messages or uses apps, how many phone calls made, etc. On the basis of these data, the manager can receive notifications. The control panel includes reports, speeding notifications, employees' maps and routes, statistics, trip and task management, viewing "Who is driving" and "Who is working" documents on the management interface and the app, and more

Smart app for the driver

The app automatically identifies and silences telephone notices, preventing distractions while driving – the no. 1 cause of accidents. The app conceals notifications that pop up and sends a return message, "I'm driving. If urgent, please call." When he stops driving, the phone automatically returns to its normal status, receives tasks, memos, and more

FEWER DISTRACTIONS WHILE DRIVING > SAVES DRIVERS' LIVES > REDUCES ACCIDENTS > FEWER LOSSES AND GREATER SAVING OF MONEY AND FUEL

260 young drivers are using ProtexMe in an Or Yarok Association for Safer Driving in Israel study. We are very pleased with the cooperation, support, service, and monitoring capabilities of the system.

Dr. Tsippy Lotan, Chief Scientist | **Dr. Gila Albert**, Senior Researcher

ProtexMe is being used in a "No texting while driving" joint study by the University of Haifa and Or Yarok, which in employees from various organizations are participating. We are very pleased with the cooperation, support, service, and monitoring capabilities of the system.

Clara Rispler University of Haifa

Implementation partner.

We warmly recommend that every fleet install the product **Gili Shlezinger-Moran** One1start Manager & V.P Marketing One1

User-friendly and efficient system, which we warmly recommend

Ayelet Ohana, MATI
